1 Summary

Dominic Williams: 2015. Aims to replace entire internet stack, not just applications layer. Maintained by the Dfinity foundation. ICP code not entirely open source. Participation is permissioned and requires standardized hardware.

2 Bull thesis

Consists of diatacenters around the world. Each datasenter has multiple nodes, and nodes form subnets, which uses a new consenus mechanism called 'subnet relay'. Testing, adding some new thing. thing thing. Nothing
